

Dry Erase Markerboard Care & Cleaning Instructions

- If your new board has a label on the surface telling you to remove the protective film, follow the instructions on the label and remove the film at this time.
- Use Best-Rite® Green Erase™ Eco-Friendly Whiteboard Cleaner to remove any adhesive residue left on the board surface. See back page for ordering information.
- For best results, use Best-Rite® Rite-On™ Markers on your new board. See back page for ordering information on markerboard accessories.
- Do not allow dry erase marker ink to remain on the board for several days without erasing.
- Clean your dry erase board weekly to prevent marker color build up. Use Green Erase™ with a clean, soft cloth to keep your board surface looking new.
- Use a dry erase marker to color over areas that are hard to clean. Then erase. The solvent in the ink will frequently clean the soiled area.
- Alternative dry erase board cleaners:
 - Soap and water
 - Alcohol
 - Glass cleaners
 - Ceramic stove top cleaners
 - Non-abrasive household cleaners
